

Name: _____ Date: _____

Instructions: Choose the best answer for each question.

1. What is the main purpose of JPanel?
 - A. To create a database
 - B. To group and organize GUI components
 - C. To listen for button clicks
 - D. To display console output
2. Which package contains JPanel?
 - A. javax.swing
 - B. java.io
 - C. java.sql
 - D. java.util
3. What is a Layout Manager used for?
 - A. To control the arrangement of components
 - B. To create Java classes
 - C. To print messages
 - D. To close the application
4. Which Layout Manager arranges components from left to right?
 - A. BorderLayout
 - B. GridLayout
 - C. FlowLayout
 - D. CardLayout
5. Which code creates a JPanel using FlowLayout?
 - A. JPanel panel = new JPanel(new FlowLayout());
 - B. JPanel panel = FlowLayout();
 - C. FlowLayout panel = new JPanel();
 - D. new FlowPanel(FlowLayout);
6. What is the default behavior of FlowLayout?
 - A. Arranges components in a grid
 - B. Arranges components from left to right
 - C. Places everything in the center
 - D. Places components only at the bottom
7. Which Layout Manager divides a container into North, South, East, West, and Center?
 - A. FlowLayout
 - B. GridLayout
 - C. BorderLayout
 - D. BoxLayout
8. How many main areas does BorderLayout have?
 - A. 2
 - B. 3
 - C. 4
 - D. 5
9. Which position represents the top area in BorderLayout?
 - A. BorderLayout.SOUTH
 - B. BorderLayout.NORTH
 - C. BorderLayout.EAST
 - D. BorderLayout.CENTER
10. Which position represents the bottom area?

- A. BorderLayout.NORTH
 - B. BorderLayout.WEST
 - C. BorderLayout.SOUTH
 - D. BorderLayout.EAST
11. Which Layout Manager arranges components into rows and columns?
- A. FlowLayout
 - B. BorderLayout
 - C. GridLayout
 - D. JFrame
12. What does new GridLayout(2, 2) mean?
- A. 2 buttons and 2 panels
 - B. 2 rows and 2 columns
 - C. 2 windows and 2 buttons
 - D. 2 columns and 4 rows
13. How many spaces are available in a GridLayout(2, 2)?
- A. 2
 - B. 3
 - C. 4
 - D. 6
14. If four buttons are added to a GridLayout(2, 2), how will they be arranged?
- A. In one horizontal line
 - B. In two rows and two columns
 - C. All in the center
 - D. Only at the bottom
15. What does mainPanel.add(topPanel, BorderLayout.NORTH); do?
- A. Removes the top panel
 - B. Places the top panel in the North area
 - C. Places the top panel in the center
 - D. Creates a new JFrame
16. What is the purpose of the mainPanel in our example?
- A. It organizes the different panels using BorderLayout
 - B. It prints messages
 - C. It listens for clicks
 - D. It creates a database
17. In our example, where is the GridLayout panel placed?
- A. North
 - B. South
 - C. Center
 - D. West
18. In our example, where is the FlowLayout panel placed?
- A. North
 - B. South
 - C. East
 - D. Center
19. Why are Layout Managers useful?
- A. They automatically organize GUI components
 - B. They remove all buttons
 - C. They replace Java code

D. They connect to the internet

20. Which statement correctly describes the three layouts discussed?

A. FlowLayout uses rows and columns, GridLayout uses five areas, BorderLayout uses left-to-right arrangement

B. FlowLayout arranges left-to-right, BorderLayout uses five areas, and GridLayout uses rows and columns

C. All three layouts work exactly the same way

D. BorderLayout is only used for buttons

Answer Key

1. B

2. A

3. A

4. C

5. A

6. B

7. C

8. D

9. B

10. C

11. C

12. B

13. C
