

1. What is the main purpose of JOptionPane in Java Swing?

- A. Creating dialog boxes
- B. Creating database tables
- C. Managing network connections
- D. Compiling Java programs

2. Which import statement is needed to use JOptionPane?

- A. import java.util.JOptionPane;
- B. import javax.swing.JOptionPane;
- C. import java.awt.JOptionPane;
- D. import javax.io.JOptionPane;

3. Which JOptionPane method is used to display a message to the user?

- A. showInputDialog()
- B. showConfirmDialog()
- C. showMessageDialog()
- D. showTextDialog()

4. Which JOptionPane method is used to ask the user to enter information?

- A. showInputDialog()
- B. showMessageDialog()
- C. showConfirmDialog()
- D. showEntryDialog()

5. What type of value does showInputDialog() normally return?

- A. String
- B. int
- C. double
- D. boolean

6. What does this statement do?

```
String name = JOptionPane.showInputDialog(  
    null,  
    "Enter your name:"  
);
```

- A. Displays a fixed message only
- B. Gets user input and stores it in name
- C. Converts name into an integer
- D. Creates a JFrame window

7. What does the null argument commonly represent in a simple JOptionPane dialog?

- A. No parent component
- B. An empty user input
- C. A hidden password
- D. A numerical zero

8. Why is Integer.parseInt(ageInput) used after getting age with showInputDialog()?

- A. To convert text into an integer
- B. To convert an integer into text
- C. To display a message
- D. To create a confirmation box

9. What happens if the user enters 20 and the program executes:

```
int age = Integer.parseInt(ageInput);
```

- A. The text "20" becomes integer 20
- B. The integer 20 becomes the text "age"
- C. The value becomes 2.0
- D. The value becomes true

10. Which escape sequence is used to create a new line in a Java String?

- A. \n
- B. \t
- C. \s
- D. \b

11. Which method is appropriate for asking the user a Yes or No confirmation?

- A. showMessageDialog()
- B. showInputDialog()
- C. showConfirmDialog()
- D. showOptionDialog()

12. Which constant is commonly used to create Yes and No buttons with showConfirmDialog()?

- A. JOptionPane.YES_NO_OPTION
- B. JOptionPane.OK_CANCEL_OPTION
- C. JOptionPane.ERROR_MESSAGE
- D. JOptionPane.INFORMATION_MESSAGE

13. Which constant represents an information message type in JOptionPane?

- A. JOptionPane.INFORMATION_MESSAGE
- B. JOptionPane.YES_NO_OPTION
- C. JOptionPane.ERROR_OPTION
- D. JOptionPane.INPUT_MESSAGE

14. Which constant is used for an error message icon in JOptionPane?

- A. JOptionPane.WARNING_MESSAGE
- B. JOptionPane.ERROR_MESSAGE
- C. JOptionPane.INFORMATION_MESSAGE
- D. JOptionPane.QUESTION_MESSAGE

15. Which constant represents a warning message type?

- A. JOptionPane.ERROR_MESSAGE
- B. JOptionPane.WARNING_MESSAGE
- C. JOptionPane.YES_NO_OPTION
- D. JOptionPane.INPUT_VALUE

16. What will the following code display if name contains "Alex"?

```
JOptionPane.showMessageDialog(  
    null,  
    "Hello, " + name + "!"  
);
```

- A. Hello, name!
- B. Hello, Alex!
- C. Alex, Hello!
- D. Hello! Alex

17. Which statement correctly displays a student's name, age, and course on separate lines?

- A.

"Name: " + name + "\n"

+ "Age: " + age + "\n"

+ "Course: " + course

B.

"Name: " + name + "\t"

+ "Age: " + age + "\t"

+ "Course: " + course

C.

"Name: " + name + " "

+ "Age: " + age + " "

+ "Course: " + course

D.

"Name: " + name + "\b"

+ "Age: " + age + "\b"

+ "Course: " + course

18. Which statement best describes showMessageDialog()?

- A. It collects text from the user
- B. It displays information in a dialog box
- C. It converts text into an integer
- D. It creates a package in Java

19. Which statement best describes showConfirmDialog()?

- A. It displays only informational text
- B. It collects a confirmation choice
- C. It converts String input to int
- D. It creates a Java class

20. Which sequence correctly describes the Student Information example?

- A. Display welcome → get name → get age → convert age → get course → display information
- B. Convert age → display course → create JFrame → get name → display welcome

C. Get course → display error → convert name → create button → display age

D. Create database → get password → create JFrame → convert course → display information

ANSWER KEY

No. Answer

1 **A**

2 **B**

3 **C**

4 **A**

5 **A**

6 **B**

7 **A**

8 **A**

9 **A**

10 **A**

11 **C**

12 **A**

13 **A**

14 **B**

15 **B**

16 **B**

17 **A**

18 **B**

No. Answer

19 **B**

20 **A**
